

**REMOVE BEFORE VEHICLE IS IN MOTION**

**Please hang on rear view mirror.  
Place opposite side facing out.  
Secure your vehicle at all times.**

**You Hold The Key!**

Regardless of year, make or model, every vehicle is a potential target for theft and/or burglary. Authorities recommend a layered approach to protection. The more layers of protection on your vehicle, the more difficult it is to steal.

**YOU HOLD THE KEY!**

## **LAYER 1**

The common sense approach to protection is the simplest and most cost-effective way to thwart would-be thieves. No cost precautions include:

- Always lock your car, close windows, & use emergency brake
- Remove your keys from vehicle and never leave vehicle running unattended
- Never leave valuables in vehicle or in plain sight
- Park in well-lit areas
- Report suspicious activity - Call 911

## **LAYER 2**

The second layer of protection is a visible or audible device which alerts thieves that your vehicle is protected.

Popular second layer devices include:

- Steering wheel locks • Brake pedal locks • Hood Locks
- Alarm Systems
- License plate locks • Tire and Wheel Locks
- Theft deterrent decals - FREE Watch Your Car Program
- Identification markers in or on vehicle
- Vehicle Identification Number (VIN) etching on window glass

## **LAYER 3**

The third layer of protection is a device which prevents thieves from bypassing your ignition and hot-wiring the vehicle. Some electronic devices have computer chips in ignition keys. Other devices inhibit the flow of electricity or fuel to the engine until a hidden switch or button is activated. Popular third layer devices include:

- Starter, ignition and fuel kill switches
- Electronic / Smart keys
- Wireless, ignition authentication
- Fuse cut-offs
- Immobilizers and Pass keys

## **LAYER 4**

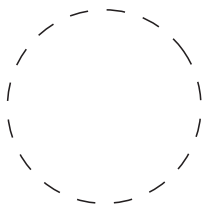

The final layer of protection is an electronic tracking device which emits a signal to police or monitoring station when the vehicle is stolen. Tracking devices are very effective in helping authorities recover stolen vehicles.
